

MOTOR YACHT 163 MT by ALDO CICHERO

A mega yacht of 163 mt.; hull in steel; superstructure in alloy; twin screw propulsion; cruise speed about 16 knots; an entirely deck for the owner, 8 VIP staterooms; 54 cabins, 60 bathrooms, 4 galleys, 2 main garages, 4 service boats, 4 rescue boats, 10 jetskis/waverunners, 2 swimming pool, an indoor swimming pool, a fully equipped gym, a tennis court, a helicopter platform; a cinema/theatre, a decompression chamber, an infirmary.

This new concept breaks with the usual strategy in today's mega yacht design for its overall design from the aesthetic and functional point of view. The external lines have no reference to other stylistic solution that have appeared on the market. The shape of the aft upper decks with the colouring of the hull and the form of the windows, simulate the dynamic effects of a luminous wake of filaments of a comet. The light plays a dominant role in the design: it combines natural and artificial lights in a unique solution for exterior and interior. There are large openable windows cut into the sides of the hull and the superstructure, which provide an extraordinary panoramic view. This mega yacht has been thought for the pleasure of long voyage and full enjoyment of the nature. Aldo Cichero thought to recreate an authentic exotic garden on board, to give the sensation of being on a island in the middle of the sea. The innovative cube on the flying bridge contains an oasis of tropical plants, inspired by ancient hanging garden with many water games.
